Kanha Tiwari

kanha638 | kanhatiwari | tiwari.kanha.2003@gmail.com | +91 8839257898

Education

Indian Institute of Information Technology, Jabalpur **2020 – 2024**
B.Tech in Computer Science & Engineering ***CGPA - 8.5/10*** *Jabalpur, India*

Experience

HiLo MRM **June 2024 – Present**
Software Developer | Angular, Python, .NET, Azure, MongoDB, SQL Server *London, United Kingdom (Remote)*

- Owned a **configurable analytics platform** enabling enterprise onboarding and custom reporting workflows.
- Optimized data pipelines via storage, indexing, and retention improvements, reducing latency by **30%**.
- Designed a **data ingestion framework** to standardize transformations, improve quality, and reduce overhead.
- Built a **document intelligence platform** with an end-to-end **RAG pipeline** for classification and contextual retrieval
- Independently developed a **marine statistical model** through continuous collaboration with mariners to align with operational requirements.
- Built a **data cleaning and file processing tool** to improve data quality for downstream analytics across modules.
- Implemented a **Reinforcement Learning feedback loop** for continuous NLP model improvement.
- Optimized **Azure container deployments** for faster, scalable, and reliable delivery through traffic routing and monitoring.
- Automated **CI/CD workflows**, reducing deployment time from **3–4 hours to 15 minutes**.

HiLo MRM **March 2023 – June 2024**
Software Intern | NLP, OpenAI, FastAPI, Flask, Azure *London, United Kingdom (Remote)*

- Integrated **LLMs into enterprise workflows** while meeting security and compliance requirements.
- Built a **privacy-first platform** for automated PII detection, masking, and secure document processing.
- Developed document intelligence services for **information extraction and classification**, reducing manual processing effort.
- Deployed ML solutions that reduced manual classification effort by **90%** and accelerated workflows.
- Built **CI/CD pipelines** for containerized NLP services and analytics dashboards for continuous model improvement.

Zyvka **September 2022 – February 2023**
Full Stack Engineer Intern | React, Node.js, PostgreSQL, AWS *Sacramento, California (Remote)*

- Delivered the first **MVP in 3 months**, onboarding customers through continuous communication and business requirement alignment.
- Built scalable **backend APIs and data services** using Node.js and PostgreSQL.
- Built performant **React interfaces** using reusable components, lazy loading, session management, and optimized API integration.
- Automated **AWS deployments** and improved scalability through load balancing and release pipeline enhancements.

Projects

Price Tracker | React, Node.js, PostgreSQL, Flask, Microservices | **March 2023 – Present**

- Architected a distributed **price intelligence platform** using microservices, defining service boundaries, data flows, and scalability requirements.
- Built independent **scraping, authentication, notification, and API services**, improving maintainability and enabling autonomous service evolution.
- Designed automated **price tracking and event-driven notification workflows** with a centralized API gateway and authentication for secure service communication.

Technical Skills

Languages: Python, C++, C#, JavaScript, SQL
Frameworks/Libraries: Angular, React, .NET Core, FastAPI, Flask, Node.js, LangChain
Databases/Tools: MongoDB, PostgreSQL, SQL Server, Azure, AWS, Docker, CI/CD
AI & Systems: LLMs, RAG, OpenAI, NLP, Vector Search, Distributed Systems, Microservices, API Design, Event-Driven Architecture

Achievements & Recognition

- Received the **Rise and Shine Award** at Zyvka for outstanding internship performance and contributions.
- Achieved a **1771** rating on LeetCode, **4-Star (1849)** on CodeChef, and **Pupil (1374)** on Codeforces.
